NOTE: The following open-ended answers are solely the opinions of the anonymous respondents to this survey. Responses are mostly unedited, but some have been reformatted slightly for to make them easier to read. Some irrelevant responses (e.g. "none"), or anything obviously fake, or copy and pasted responses have been omitted. All-caps responses have been changed to all lowercase. All responses for each week, unedited, are available in the raw data spreadsheets at TimingResearch.com/data.

Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

"Higher" Respondent Answers:

- trend
- Toppy, Market tippy FEd d0ne l00sening
- Chart and seasonality
- TARIFFS
- Option Expirations Week
- The market is melting up because of FOMO and many companies reporting better than expected earnings and forward guidance. I also think we'll continue to melt up thru the end of the year with 3300 S&P in sight.
- The trend continues

"Lower" Respondent Answers:

- The market may have a resistance
- Reversion to the mean of the trend
- China, Iran, Fed
- momentum is starting to roll over. Earnings reports are slowing down.
- Overbought, overvalued, low volumes, and reduced momentum.
- WE AR 5+% ABOVE 50DMA ==usually an area to be cautious of drop or pullback
- We all know it will only be up as long as trump keeps playing his china story. I still think it must go down and lower than this week
- Because of impeachment hearings
- No reason - that's why my confidence is only 50%. More specifically - there are SO many fundamental as well as technical reasons - but none of those reasons have stopped the uptrend yet.
- Momentum from last week to be reversed.
- The S&P has reached its top trend line and Bollinger band top. It may move up a bit, but heavy resistance at 3100; so downward it should go.
