You are reading Issue #014: Massive Growth Potential from Small EVs (FUV)

Download ALL past Stock Spotlight Reports HERE.

NASDAQ: FUV Arcimoto, Inc.

Interest in the electric vehicle market has greatly accelerated in recent years, mainly due to the prominence of Tesla (TSLA), but there are many smaller companies working on innovative new designs for electric cars, motorcycles, planes, and even boats.

Arcimoto focuses on "Fun Utility Vehicles" -- basically 3-wheel vehicles that are something between a small car or a large motorcycle built primarily for quick transportation and parking in urban environments.

FUV's market cap is currently around \$440 Million, with an average daily share volume of about 900,000. The company currently pays no dividend. The stock is up about 108% over the last year (as compared to about 40% for S&P500) with share price growth being similar to many other smaller cap companies of massive growth last year through early 2021 and drifting lower since but seems to have found a solid base of support around \$10.

FUV may be a good stock to consider for a long-term speculative investment in the EV industry.

Read on for charts, more info about FUV, similar companies, and other relevant info.
