NASDAQ: MIME

mimecast^{*}

Mimecast Limited

Mimecast was founded in 2003 and has been public since 2015. They focus mainly on corporate email and data security. MIME is a large holding of all 4 major cybersecurity ETFs (CIBR, BUG, HACK, and IHAK). There is already a massive need for cybersecurity services and that is only expected to grow rapidly in coming years and Mimecast is well-positioned to profit from this trend.

Issue #4 of this report profiled another cybersecurity stock, FTNT on 8/22/2021. It is up almost 15% since then, download the report <u>HERE</u>.

MIME's market cap is currently around \$5 Billion, with an average daily share volume of about 900,000. The company currently pays no dividend. The stock is up about 83% over the last year (as compared to about 35% for S&P500) with most of that growth being since May.

MIME may be a good stock to consider for long-term and short-term growth in the cybersecurity industry.
