TimingResearch Crowd Forecast Prediction: 65% Chance Higher

This prediction is an attempt by the editor of this newsletter to use the full 6+ year history of data collected from this project to forecast a probability estimate for whether this week's sentiment is going to be correct and ultimately what the markets will do this coming week.

Details: Last week's majority sentiment from the survey was 64.3% predicting Higher, and the Crowd Forecast Indicator prediction was 56% chance Higher; the S&P500 closed 1.92% Higher for the week. This week's majority sentiment from the survey is 75% predicting Higher but with a greater average confidence from those who are predicting Lower. Similar conditions have occurred 26 times in the previous 358 weeks, with the majority sentiment (Higher) being correct 65% of the time but with an average S&P500 move of 0.31% Higher for the week. Based on that history, the TimingResearch Crowd Forecast Indicator is forecasting a 65% Chance that the S&P500 is going to move Higher this coming week.

NOTE: The following open-ended answers are solely the opinions of the anonymous respondents to this survey. Responses are mostly unedited, but some have been reformatted slightly for to make them easier to read. Some irrelevant responses (e.g. "none"), or anything obviously fake, or copy and pasted responses have been omitted. All-caps responses have been changed to all lowercase. All responses for each week, unedited, are available in the raw data spreadsheets at TimingResearch.com/data.

Question #3. For your answer to Question #1, please share what specific reason(s) you think the S&P500 will be heading the direction you chose.

“Higher” Respondent Answers:

- Trend
- FAANG
- COT EMinis more postivie
- Trend continues
- The trend is still our friend
- The trend is still up. I am cautiously bullish. We do see some signs on our side of the pond (SE Asia) that not all is well in local economies and who knows, will there be a spill-over effect to US markets?
- Price will be upward with no bad news.
- The 20 day MA is way above the 50 day MA which is even feather above the 200 day MA .
- The Trillions USD from Jay Powell and the open spigot waiting to spew \$\$\$ defies ALL other market-affecting data. Enough said-- not dismal employment reports, not dumb W.H tweets, not Covid world-worst results, will affect the S&p 500.

“Lower” Respondent Answers:

- The market was upward parabolic this past week. Due for corrective action this coming week.

Question #4. What procedures do you use for trade management?

- Stops
- I have a simple set of rules in place that cover up. down or sideways markets and especially when to roll option positions. In addition, because of the part of the world I live in and sometimes unreliable internet connection, I have made plans for incoming bad weather events and occasional natural disasters. My trade may not always end with the max potential profit but we will never wake up to "the bad surprise."
- Stop Loss
- Take profits at 100% and exit if down three days in a row.
- T.A, Momehtum charts, GAP.

Question #5. Additional Comments/Questions/Suggestions?

Thank you for all the feedback, feel free to [contact us](#) at any time with any other questions or comments.

- Kept moving 8 days in a row. Worried that it will need to correct.
